

Eterna Product Guide

Eterna 100mm

Designed to meet the highest standards for public, commercial, and residential works, Eterna is the ultimate solution for demanding urban conditions. This reliable 100mm (3.94") thick interlocking pavement system, manufactured using Oaks' EliteFinish™ face-mix technology, delivers a harder wearing, more durable, and smoother textured surface. The system features four modular sizes, individually packaged, and a core group of enduring colour blends. Eterna's sleek interlocking pavement design offers vast patterning possibilities, providing a perfect blend of aesthetics and performance.

EliteFinish™ is an advanced manufacturing process that delivers richer, more vibrant colour and a harder wearing, more durable and smoother textured surface.

The surface of our EliteFinish™ products is a specially engineered layer of finely-ground, durable aggregates combined with rich colour and concentrated cement. The paver foundation uses coarser stone to ensure long term performance in application. The resulting product delivers an enhanced finish and greater structural integrity.

Colours

When ordering Eterna, try to secure product from a single batch lot to reduce the risk of variability. Colour and tonal consistency between different sizes and batch lots cannot be guaranteed.
