

### DOUBLE SIDED SPLIT FACE

Proterra Corner Unit - Double Sided Split  
(Adjust length as required to match wall coursing)

BOTH STANDARD AND CORNER UNITS COME IN SETS OF THREE, 2 THAT HAVE A SINGLE SPLIT FACE AND 1 THAT HAS A SPLIT FACE ON BOTH SIDES. UNLESS DOUBLE SPLIT FACE UNITS CAN BE TAKEN FROM A DIFFERENT WALL INSTALLATION ONSITE, THIS BLOCK COUNT NEEDS TO BE ACCOUNTED FOR IN THE WALL LAYOUT

### SINGLE SIDED SPLIT FACE

Proterra Corner Unit - Single Sided Split  
(Adjust length as required to match wall coursing)

Proterra Corner Units are recommended at the end of the wall where exposed (i.e. not butting up against a building or other structure). If only using Standard Units, the M-lock interlocking system will be visible at the exposed end of the wall.

This graphic represents a preliminary, non site-specific design. If used for construction, a registered professional engineer must be retained to review & approve the design, confirm site conditions, and inspect construction.
